Education

FullStack Web Development
Masai School
July 2024-present

Bachelor of Commerce
GITAM University
September 2017 - September 2020

Technical Skills

JavaScript · MongoDB · Node.js · React · Express.js · Git · CSS3 · HTML5

Soft Skills

Adaptability · Teamwork · Problem Solving · Time Management

Achievements

Senior State Athletics Championship 🔗
CTAF

Certifications

DevOps 🔗
NareshIT

Masai Speaking Marathon 🔗
Masai School

Professional Summary

Dynamic Full Stack Web Developer skilled in JavaScript, Node.js, and React.js with strong expertise in the MERN stack. Proficient in MongoDB for efficient database modeling. Excels in applying Generative AI for innovative solutions and quickly learning new technologies to enhance development processes.

Experience

| **Aakash Education Services Limited** | Operations Manager | July 2023 – June 2024 |

- Collaborated with technical teams to solve software and hardware issues, ensuring smooth operations and aligning with the role's need for troubleshooting and problem-solving skills.
- Customized internal software applications with developers to improve usability, demonstrating experience in enhancing user interfaces, relevant to frontend development responsibilities.
- Analyzed data and generated reports for decision-making, highlighting proficiency in data handling, benefiting backend development and API integration.

Projects

LetsChat   Live Demo Link   Github Repo Link

JavaScript · React · Node.js · Express.js · MongoDB · Git · CSS3 · HTML5

- Developed with the MERN stack (MongoDB, Express.js, React.js, Node.js), showcasing proficiency in each component.
- Built a real-time messaging application with typing indicators and read receipts using the MERN stack.
- Developed features for media sharing, user profiles, and real-time notifications.
- Integrated real-time messaging with typing indicators and instant delivery for efficient communication.

Calories Tracker   Live Demo Link   Github Repo Link

JavaScript · React · Git · Express.js · Node.js · MongoDB · CSS3 · HTML5

- Developed a web application to track and manage user caloric intake using the MERN stack.
- Implemented QR code generation for nutritional information sharing.
- Designed features to calculate total calories for selected food items.
- Conducted extensive testing and debugging for reliability and stability, ensuring accurate calorie tracking and sharing via QR codes.
